

Project Profiles

Wastewater Treatment

Project Name: **Portage la Prairie**
 Client: McCains
 Location: Portage la Prairie, Manitoba, Canada
 Project Type: WAS - Sludge Management
 Size: N/A
 Date: 2003
 Value: USD 200,000
 Services Provided: Process Design, Equipment Specifications & Operation Manuals

This project was in a region with climatic extremes. The digester was designed for anaerobic digestion of pre-thickened Waste Activated Sludge at a municipal wastewater treatment plant accepting waste from one of McCain's potato processing facilities. Special design and operational features were implemented to control foam production.
